#2

The second edition of the Athens_Wave Newsletter is here!

...and we are off to a great start!

The project Implementation Unit (PIU) has been established

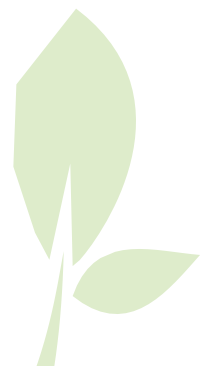

The PIU has been officially established consisting of 7 members, 3 of which are from Anaplassis, 2 are from TREK Development and 1 from the Municipality of Athens.

The role of the Project Implementation Unit (PIU) is to:

- Overall Management
- Coordination
- Monitoring
- Stakeholder Communication
- Technical Assistance
- Communication and Dissemination
- Compliance and Reporting:

The PIU ensures the successful delivery of the project's objectives, including energy efficiency improvements and the transition to clean energy within the Municipality of Athens.

Progress alert!

Energy audits and techno-economic studies have begun!

The tender process for the conduction of the energy audits and techno-economic studies has successfully concluded, and the experts have started their work!

The tender process followed the legislation framework set by the national public procurement framework and the EU Directives 2014/24 & 2014/25 for the conduction of the energy audits and techno-economic studies for public buildings.

For all of the above, [LM Engineering Firm](#) have been awarded as the winners and a contract has been signed.

A first meeting between LM Engineering Firm and the PIU is in the books!

Energy news across the EU!

"One of the most successful EUSEW sessions ever"

More than 2,200 delegates attended the European Sustainable Energy Week (EUSEW) in Brussels this week, with a further 8,000 participants following events online – making it one of the most successful EUSEW sessions ever. These figures reconfirm its position as the biggest annual event dedicated to renewables and efficient energy use in Europe.

This [video](#) gives us a taste of EUSEW2024!

Meet our Team

Anaplassis SA

Lead partner Anaplassis is a government created-independent organisation that is planning, designing, implementing and coordinating a series of Design Studies, Public Works, Operational Actions and Campaigns, in order to improve the quality of life, social cohesion and economic development of the city of the intervention areas.

TREK Development SA

TREK Development, with over 27 years of experience in coordinating and implementing EU-funded projects, actively works in the field of Energy Efficiency, by providing technical assistance to Regional Authorities and Development Agencies in Greece and abroad. In addition, TREK Development has significant experience in introducing Energy Efficiency principles to public and private bodies, in designing and planning large scale energy efficiency projects, in identifying alternative funding options and developing financial models for assessing the relevant investments and in successful energy efficiency related projects' delivery.
