Welcome to the first edition of the Athens_Wave Newsletter!

Athens_Wave at a Glance!

Athens_Wave is a transformative initiative dedicated to consolidating and advancing a series of energy efficiency investments in and around the city of Athens, with a strong focus on retrofitting and upgrading the stock of municipal buildings and schools.

The project sets forth to provide Project Development Assistance (PDA) to support the maturity of the aforementioned investments, enabling them to attract private financing and facilitating investment delivery through Energy Performance Contracting.

The primary objective is to eliminate administrative and market barriers, thereby paving the way for substantial improvements in energy efficiency and sustainability.

Key Objectives

Maturity Acceleration

Athens_Wave aims to fast-track energy efficiency projects to achieve critical mass for private financing and Energy Performance Contracting.

Replicability

The initiative seeks to serve as a model for other municipal, regional, and central government entities at both national and EU levels, encouraging the bundling of public infrastructure for energy retrofit through energy performance contracts.

Sustainability

All initiatives under Athens_Wave contribute significantly to energy efficiency, sustainability, and the reduction of energy consumption and emissions, aligning with local, national, and European targets. Additionally, it aids in reducing air pollution in Athens.

Improved Comfort and Health

The initiative places a strong emphasis on enhancing indoor comfort and health conditions for building occupants and visitors.

Impact

Athens_Wave is set to optimise energy efficiency in the city of Athens, particularly through the retrofitting of two bundles of public buildings using Energy Performance Contracts (EPCs). The project's overarching goal extends beyond energy savings; it's about mobilizing private and public resources to maximize the environmental and societal benefits through a blended financing scheme.

Social Impact

Capacity Building:

Empowering 325 individuals, including Athens Anaplasia personnel, municipal officers, and teaching staff.

Environmental Awareness

Raising awareness among 6,210 people, including 2,070 students and 4,140 family members.

Employment Generation

Creating 33 full-time equivalent jobs

Future Prospects

Maturity Acceleration

Athens_Wave aims to fast-track energy efficiency projects to achieve critical mass for private financing and Energy Performance Contracting.

Meet our Team

Anaplassis SA

Lead partner Anaplassis is a government created-independent organisation that is planning, designing, implementing and coordinating a series of Design Studies, Public Works, Operational Actions and Campaigns, in order to improve the quality of life, social cohesion and economic development of the city of the intervention areas.

TREK Development SA

TREK Development, with over 27 years of experience in coordinating and implementing EU-funded projects, actively works in the field of Energy Efficiency, by providing technical assistance to Regional Authorities and Development Agencies in Greece and abroad. In addition, TREK Development has significant experience in introducing Energy Efficiency principles to public and private bodies, in designing and planning large scale energy efficiency projects, in identifying alternative funding options and developing financial models for assessing the relevant investments and in successful energy efficiency related projects' delivery.
